

DBQ #15

Nationalism had many effects on many different people. They had some good and some bad just like all things in life. What I will be talking about is the **Effects on the governments, Effects on the citizens and Negative effects.**

First we will talk about the effects on the governments. In **Document 1** it states that everybody wanted to be part of the French revolution in France. That can have a big effect on the government since the citizens of France were fighting against the government. That would have a very large effect on the government. In **Document 3** it talks about helping and having allies to benefit your country and since the government controls the country it would most likely have an effect on the government. In **Document 5** it states how Prussia could no longer carry the weight of Germany any more so they had to make adjustments in order to keep their country going of course the government was making the adjustments. In **Document 7** it illustrates a picture showing different European countries and the big word Nationalism. It shows the European countries coming together through Nationalism.

Now the effects on Citizens. In **Document 1** as stated in the paragraph above all of the citizens helped out in the revolution that would have a very big effect on the citizens. In **Document 2** it shows some of the national anthem in France. Since it is talking about people coming together and fighting it would have a huge effect on the citizens because music can cause inception. In **Document 4** it shows part of a speech of a man persuading the citizens of Italy to follow him and fight for the country. In **Document 5** it states giving security to people of the country because of issues. In **Document 6** it talks about a man freeing the yugoslavs which would be an effect on the citizens of Yugoslavia.

Now finally the Negative effects in Nationalism. In **Document 1** once again the people should not have to work over time to win a war I just feel like that ruins some of

your time and life. In **Document 2** the whole anthem states that everyone should go and fight I don't feel this is right because people shouldn't be told what they should do.

So like all things Nationalism as Positive and Negative effects on many different people.
